

Origin Brand Guidelines

v1.7

Origin Protocol wordmark — primary

Our primary wordmark remains an essential identifier of our brand and should be used when talking about Origin Protocol as a company. Always use the blue version when possible.

There are separate logos for the Origin products which we will come to later.

The image shows the primary wordmark for Origin Protocol. It consists of the word "ORIGIN" in a bold, blue, sans-serif typeface. The letter "O" is stylized with a white diagonal slash running from the top-left to the bottom-right. The letters are all in uppercase and are evenly spaced.

Origin Protocol wordmark — monochrome

Origin Blue is our brand color but our wordmark can be used in black or white when necessary.

Use the white or black versions of the logo on darker color backgrounds or imagery when the blue version lacks clarity.

Use the black version on lighter color backgrounds or imagery when the blue version lacks clarity.

Spacing

Try not to crowd our logo. The clear space around the wordmark is the width of the O.

Origin Protocol symbol

The symbol can be used when the context and association with Origin Protocol is clearly established and controlled (examples: the Origin blog or Twitter profile), or when the Origin brand is meant to take on a secondary, supporting role (e.g. partnerships).

Without the user of Origin's primary color, the O symbol might not be recognizable, which is why it always appears in Origin Blue.

The Origin Protocol symbol is always contained in a square, so it's not to be confused with the OGN token symbol.

Color

The wordmark should appear in Origin Blue, except when limited by production value or backgrounds where the blue loses clarity.

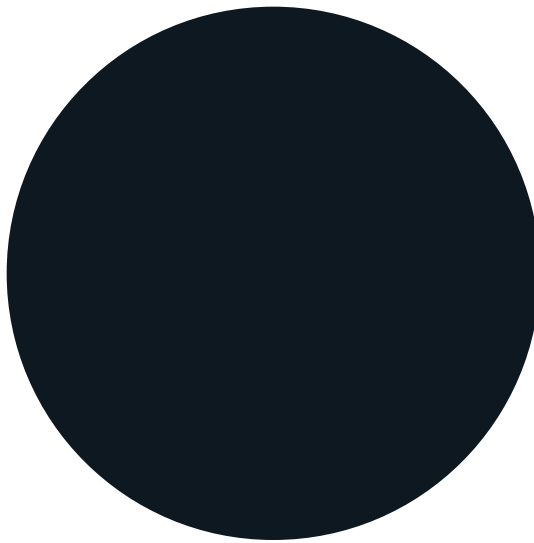

The symbol should always appear in Origin Blue.

In addition to Origin Blue, we use an off-black tone for background and multiple tones of grey to add dimension to the palette.

Partnerships

The design element that separates the two logos can be flexible in form. Origin Blue should be used whenever possible to represent the Origin brand.

Try to make sure there is equal sizing and spacing for both logos and appropriate spacing is used to separate them.

We have provided some examples of different separators to showcase the flexibility.

Origin ARM logomark

The logomark for Origin's ARM product is a rounded square to distinguish it from a circular token icon. The logomark and the wordmark should never be used together.

The logomark will have variants depending on the LST being redeemed. We will also have separate variants for the LP tokens.

Typography

Our primary typeface, IBM Plex Sans, is always used for headlines. Our secondary typeface, Inter, should be used for body copy and smaller text sizes.

[Download](#)

Our primary typeface, IBM Plex Sans, is used for headlines. We try to stick to the Bold weight.

Our secondary typeface, **Inter**, should be used for body copy and smaller font sizes.

It is recommended to use Inter for sizes smaller than 16pt.

Backgrounds

When placing icons on a similar color background, use a circular shape behind the icon to separate it from the background.

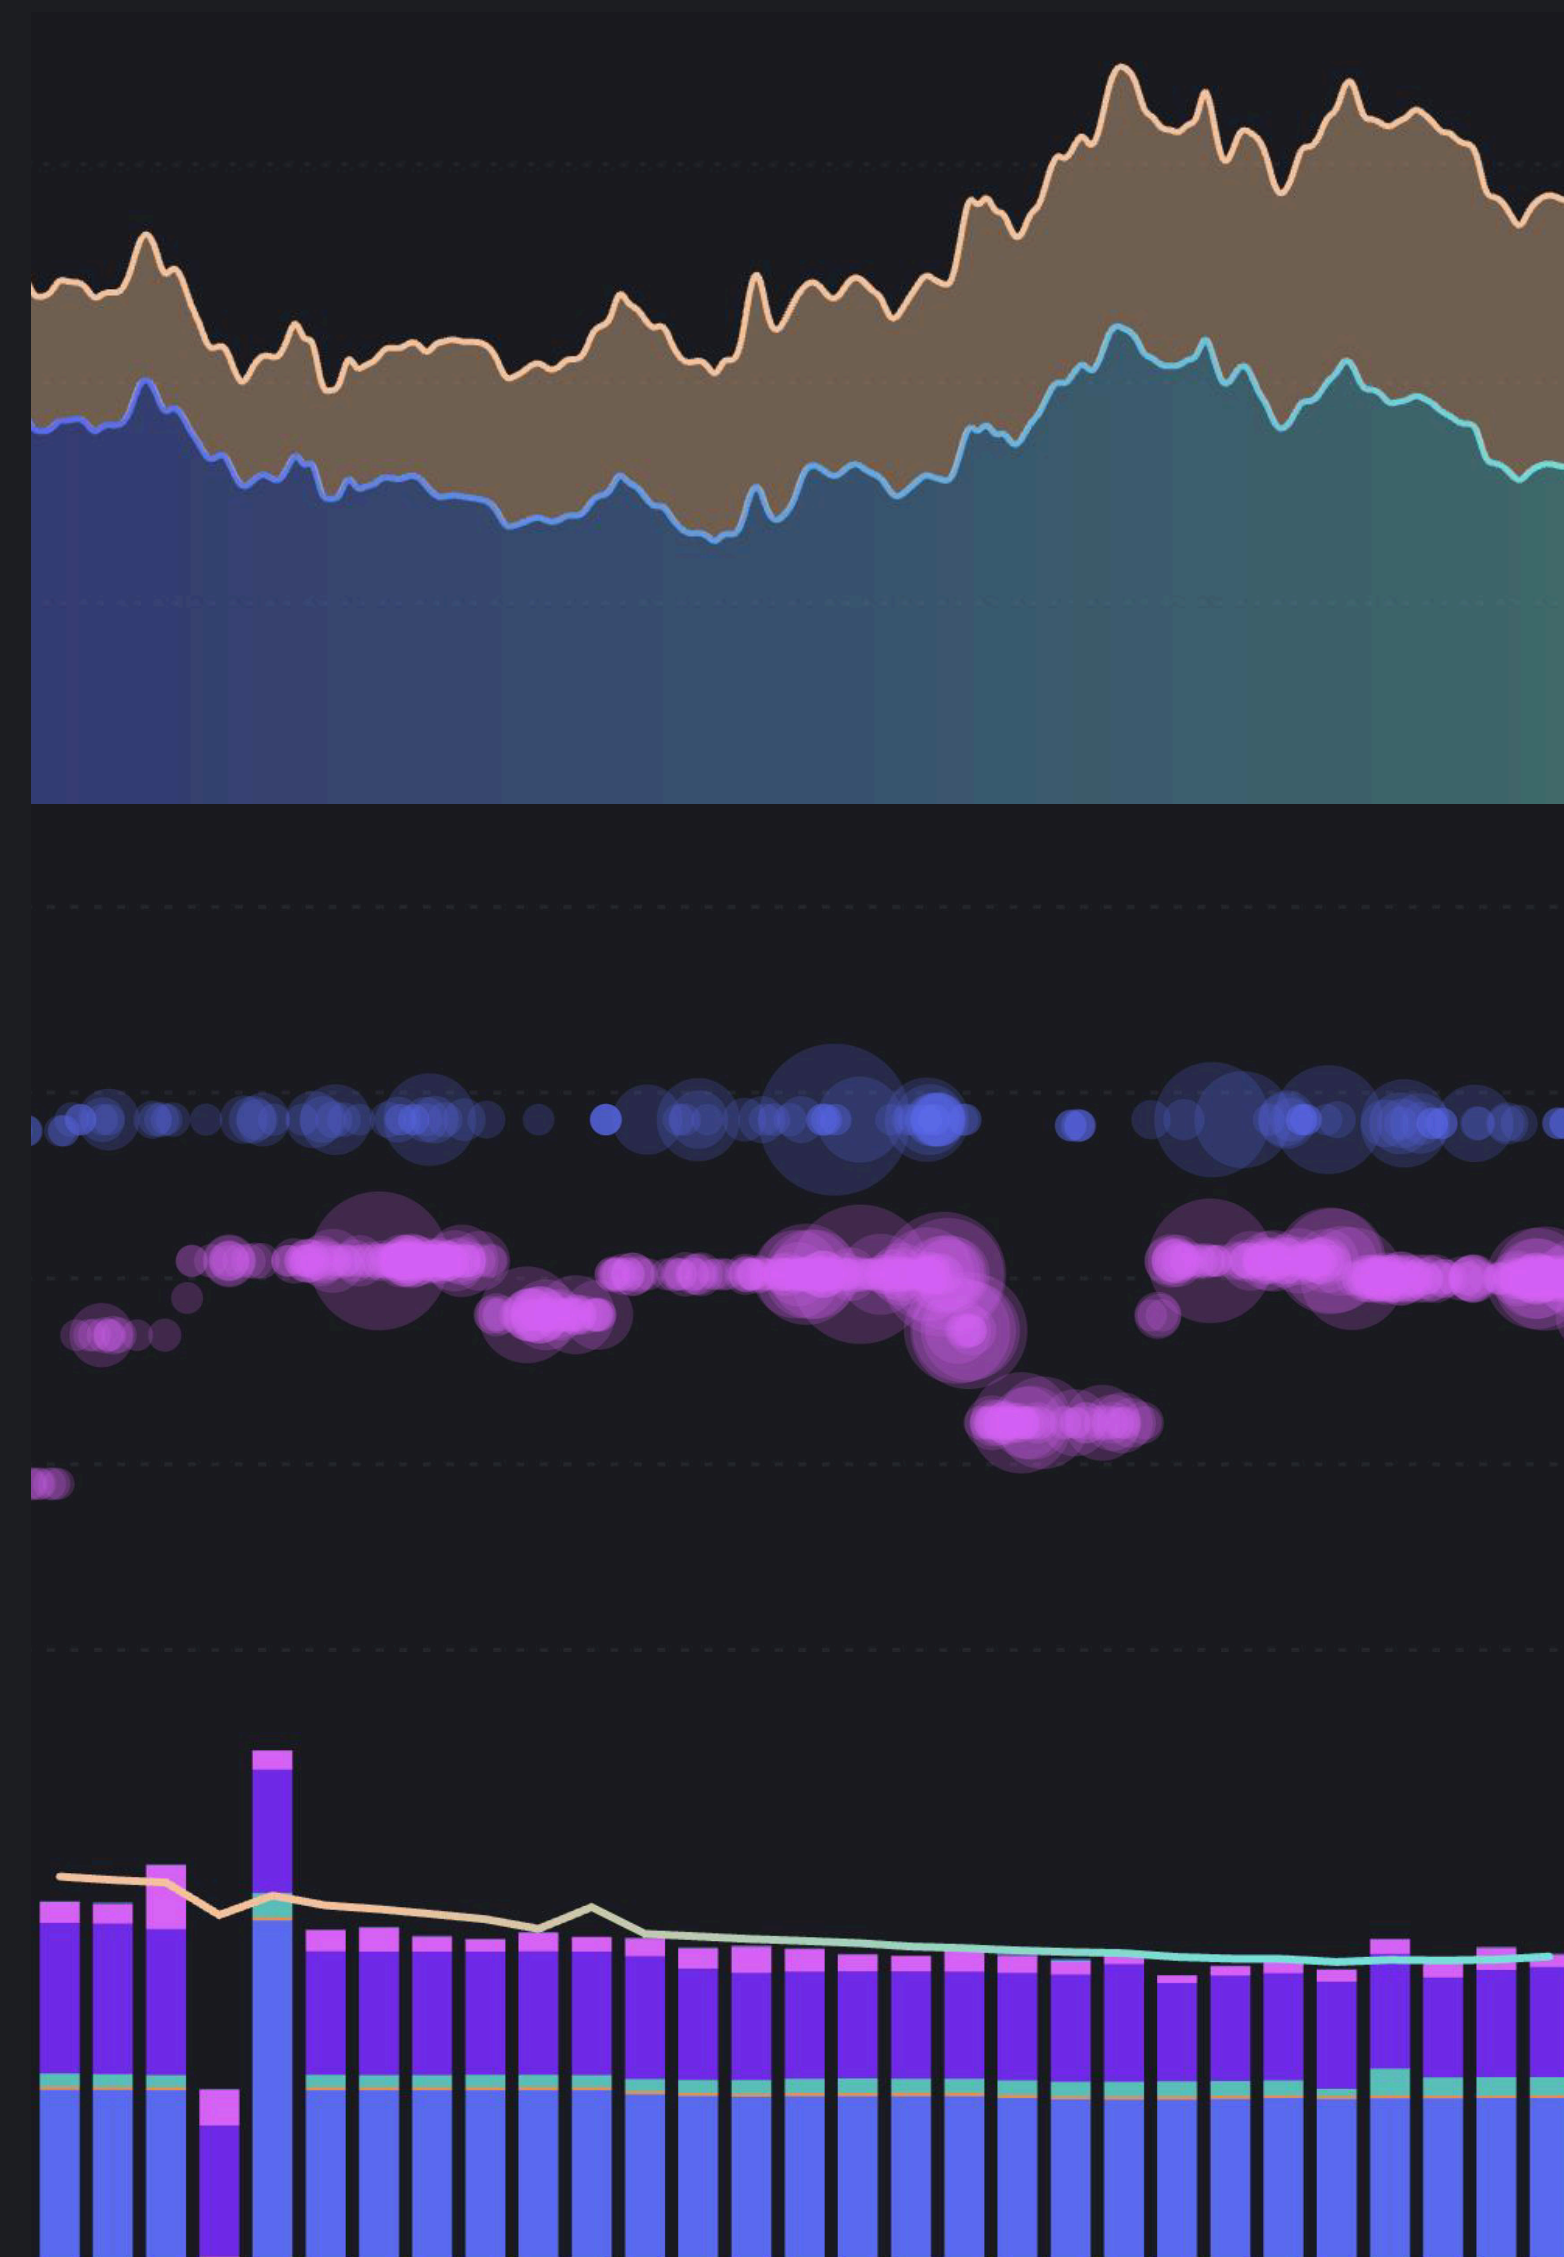

Only colors within the Origin palette are allowed for backgrounds.

Motifs

Animated data visualizations can be used sparingly to add visual interest to a layout.

Preferably these animations should be based on data generated by Origin.
